

397th Knowledge Seekers Workshop

Key Words

September 09, 2021

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (Summary by KF Brazil)

(Part of Transmutation Transportation of soul teachings begun 392 KSW)

Many of our teachings are destined for our children great grandchildren
We need a radical new science - to bring change - improve life of man and beyond
Last week we concentrated on Book 2, Light - dimension (D) of travel in the U
Let's see how far we can open this knowledge for man
Mankind latest race - opened to light as a means of transportation
We go to moon with light - we just tune to the heartbeat
We tune to the M field strength - into the rhythm of the life of the moon
The way our oceans tune to moon - allows us to find our position in respect to it
We position ourselves on moon - by adjusting G and M fields
KS can use your reactors - tap into MG fields moon continually sends
By tuning our systems we can ride the G field back to the moon
We can discover the 2 MG fields the moon uses to rise and fall the ocean tides
The trick is - we become the water - find sequence and ride the field back to moon
It's like a monkey jumping 2 strings - from one to other - we know how to divert
You decide the strength of field to travel there and back on - anywhere in U
If SL on earth is 1 - this strength in inner sanctums could be 10
To go faster - go deeper in the strength of plasma of the destination point
How fast you go depends on - how far in the spiral of Pl you go - what strength
You can choose a travel with a stronger M field - even millions of times earth's SL
You decide what strength - by what place on the plasma's spiral you choose
This method - you can travel to place where no MG fields - you create them yourself
You create the rendezvous point in space - and the speed you want to travel there
You don't catch rendezvous point - you are already in it - (it's part of you)
Multiple reactors (create the dome) - like the defense T (capture of drone)
Multiple reactors allows you to (select your speed)
You become point of destination - pressurized by M and G fields
No restriction - can go inside earth - you create MG field strength at point
Now you can live within the magma - process of Transmutation Transportation
Swim in heart of man - doctors can be present during heart valve repair
It's the light which arrives - transfers information and knowledge - center of sun
We are part of the process - we choose the destination and speed
How do we protect ourselves while traveling speeds beyond the imagination
When come to a halt - body goes through physical changes - pulling Gs
Do we have a G transformation at the speed of light?
In our systems - (handle) any strength of the M field

Does not matter if you come to it, or you go away from it.
Does weightlessness exist - at speed of light?
We can create weightlessness, but we don't need to live within it.
If tune into universal M fields with the body - has limitation of physicality
For speeds of 1000L convert to soul suit
Where the soul becomes the frock of the physicality.
STM has D of totality - can protect physicality at any speed
We can link to anything at any point as it needs, (:28). to go to, or to come from.
Use STM as another tool of transportation - any where in U - speeds beyond
Now you understand why we started teaching about the soul.
Gain confidence with the soul - get in it and use it to travel anywhere
But unfortunately, you have already imprisoned it.
Advancement of races in U - are measured by how fast they travel
A different knowledge is required for different stages of higher speeds
Higher speeds - needs higher strength - more devotion and detachment
Knowledge of how you fast travel - shows strength of understanding creation
Understanding creation of fields - allows you to reach speed of totality of Creator
Depends on the devotion of man - to the knowledge of creation
Knowledge of U depends on understanding - process of interaction of the fields
When you become travel of the U, knowledge of the U is open to man.
But man has to understand which part of it, he understands and can be part of.
Living by ethos - collect in the center - as an essence of the soul
This is why we call planets like earth the nurseries of the creation.
Understand the limitations of the physicality into the D of work of the U
What you gather on earth through your soul - becomes your food for life in U
How do you keep the integrity of STM - Physicality - emotion during travel?
To keep integrity you need a higher field strength of at 1000L
Then you need the knowledge to be able to create a field protection
If you don't keep field strength - (you will dissolve in space) - absorbed by fields U
Need to understand how man engages his soul - even to travel with UFOs
The barrier is created - from higher field strength in depth of his existence
Secret method - understand which M fields in deeper strength to release
You use the inner (strengths) - to create the condition to protect the outer boundary
This knowledge has been taught in Book 3 in a clear way.
Man is fully equipped within the strength of his soul - travel anywhere in U
And all that knowledge from A to Z is in the 3 books.
We have covered the whole knowledge - But it's for you to unravel the secret.
Use Soul System - carry STM & physicality - manifest anywhere in U
STM creates condition of physicality - in atmospheric condition of earth
Now go deeper in soul create another frock - to protect soul within Unicose
Understand field radiation & cosmic ray - in its true essence of motion of U
Understand how interaction with fields of earth created physicality at this point
When man goes deeper in soul strength - man will have a new look
Biggest secret - how to release fields so you can create different dimension
Next step is to create strength of another galaxy - or even the Creator
The true transmutation - is encompassing one D inside another to transport

Use the same soul to also create materials from the fields - Not change materials
You use the same field interactions - without fear of demise
KF will provide systems - that allows you to encompass the STM
We teach you how to allow soul - to create different field strengths
We teach you until you learn (by yourself to do it)
First child (born) - by interaction of PI fields - out of womb of mother - will be tested
Man's children born both in D of physicality and soul - at same time
Child will have the facility and knowledge of speed of light of U
This is why we introduced the EU - to create new generation of man
That (the next generation of) man will not do any more wrong.
New generation of children of the Man - will be flawless - never kill
Never destroy - because they know - what they need is within their soul
(They will be) the children of the Creator.
The new race of man will start very soon
These new children will teach man - how to handle new understanding
Because they are one step ahead of us in the knowledge.
Future generation of man - will teach him to be detached from physicality
This is my wish, and my wish is command, and it shall be done.
Understanding totality of creation - man travel in both dimensions
Chooses best in physicality - becomes best in (soul)
First we need to know what knowledge we do carry - then wish for higher
We have started setting up the first centers - teach man to become - "man of space"
Space travel through soul - Not with spacesuit
Man through his soul - travel and change in all D and directions
Mankind needs a helping hand to jump from physicality - to D of fields of the U
Until mankind achieves peace - He will be barred from both knowledge's
This is what we call the knowledge of the creation.
First child with this knowledge - already part of race of man
You have all the tools - to understand interaction of fields of U
Have all tools to make the change - Understand the totality
Not what field energy mankind can attain - but understanding knowledge creation
It's not by a machine - Man has to understand interaction of the fields of U
Keys to heaven open - when man understands D of fields and their strengths
Very few will endeavor to teach the knowledge of the U
If I teach - will man abuse - or will he go to a new D
Man will go to the source of the STM to understand totality of operations
Mankind can become a totally independent entity - live anywhere in U
Man will learn through the EU
STM is embedded in EU - interaction with soul is ultimate goal
(If) we touch the soul, we reach the U.
(If) we touch the man, we still be in the prison of the village of the earth.
The purpose of EU is to elevate directly through the STM
First spaceship centers on earth - live and work in perfect condition
First space cities to be built in Iran - Learn how to live across U
Through new T we'll interact with the Universal Community - help us
Not weapons T - Every man have access to totality of knowledge

Space cities - share knowledge with travelers of U - share emotion of love & care
Totality of knowledge of creation - sits within structure of man
Become weightless - through the devotion to server the others in U
Mankind's twisted idea about serving others - this idea will change
In Universal Community - The highest position is to serve the others in the U
The Earth is the embodiment - the source place of - Life
New souls leaving this planet to create a new sun - will carry new essence with them
New Man - never harm any collection of physical souls - we call "Plasmatic Fields"
Problems with STM leaving earth - still carries behavior in STP
We need to change this behavior before we make man, a man of U.
Through the EU - gradually man will change - elevate - the rest will follow
Different version of EU - for different methods of Transmutation & Transportation
Travel with totality of physicality - Body EU - Vertical - Horizontal
Travel with fields of emotion & STM - Vision EU
Another way to travel is expansion of STM - hint was shooting star
Knowledge of expanding the STM plasmatic M fields
The STM decides - the other souls learn by satisfaction of knowing it can be done
With SS - I create the point and D in the emotion of the man - not the system
How easily I can move within your soul - physicality is just a play
You see my vision through soul - your eyes fool you about existence of meteorite
I create shooting star in your soul - your soul converts it to reality of physicality
I am the best magician you ever see in the U, but still live in the frock of the man.
Purpose of Vision EU - you to develop confidence to take D of the soul
Vision EU is already agreed with KF Arizona - part of peace dividend
Understanding the process of the knowledge will make you a beautiful magician.
It's how the magician allows us to see the magic
I am the One - I came with knowledge of creation and Creator - depends on you
We came with the totality of the knowledge for the man
Now is the time to educate the man in Totality - across the whole planet
First you have to accept the Peace - within and without - in D of physicality
Mr. Keshe outside hotel where peace negotiations going on
Leaders of this planet have to agree - All are equal in - race - belief - as One Nation
I have never failed in any of my work in the D of the creation to achieve what I want
Try to understand the inner sanctum of your own being - what has created you
If you are not happy want to change - Go within your soul
Change color of your eye - no need to cut open body
If you are happy to serve - it shall be served to you
Advice to Dr. Rodrigo - about loosing soul and knowledge
Try to create systems that - interact with the fields of the STM
When you go into systems - your soul knows truth about what you want
Linz Exhibition like Chicago Fair - Tesla showed light bulb
Linz Exhibition will change the life of every man - light of soul within
Beautiful Tesla enlightened the physicality, and I enlighten the soul.
Both for same purpose - bring comfort and progress for mankind
Maybe it's the same soul in prophets and scientists?
We've felt the hammer and nail of the cross - same in Chicago

In essence it's the same man - soul - maybe similar features
Path for mankind to live correctly has been set for thousands of years
Understand the transmutation, then you'll understand the totality of the creation.
This is why we wrote paper on scientists and prophets come from same soul
Mankind matures to point of no ambiguity of what is to come
Some similarities are kept (between prophets) to recognize the original soul
Try to understand the interaction of the fields - to become man of U

QUESTIONS

We teach you how to use the field strength - that takes you beyond speed of light
If you cannot do it with your soul, create the machines - you call it UFOs.
They create the conditions of your soul - to travel at the higher speed for you
But with the UFO - the soul is still entrapped in the totality of it
With the new knowledge - the soul has an option to be carried on its own
It does not need the donkey or the aircraft, or spacecraft
When you mature enough - the better system is within yourself
Purpose of teachings is for you to learn to travel with your soul
It depends how many more layers - you want to put on this physicality
The father knows how to answer the child - to enlighten him
We have tried long enough to teach children of man - now the totality in one go
Brazilian community - example of teaching everyone on planet
Brazilian workshop was a beautiful example of sharing knowledge
Beautiful to see people in Amazon wearing Gans ring - making Cup of Life
Thank Rafael and Brazilian team spreading knowledge - saving lives
Indigenous people around world - "put right what has been done wrong to them"
Rick talks about "create the future" contest by NASA - EU was entered
NASA has (black listed) KF - will not let fair play
The Visual EU released a few weeks - totally different from the previous goggles
Nail Fungus clinical trials started by KF
Nobel Prize meeting Delft University for KF discovery of gravity
Nobel Prize is a fake - professor resigns - others threatened
The following answers are in regards to -
Question about better understanding new knowledge of the light
Colors in sunset represent spectrum of different field strengths - like rainbow
The strength you apply or receive - dictates the spectrum of light
Strongest source of light - comes from the Creator
The light can create subdivisions of itself
Understanding the light - needs confirmation of existence - not visual acceptance
Blind man cannot accept frequency - no confirmation - no conversion in brain
I can make a blind man see - I confirm what soul wants to see
The soul creates a visual manifestation - like bats using sonar
Light starts with the Creator - interacts with itself - continually subdivides
To travel at higher speeds than vision - have to go deeper - means higher strength
Describes traveling speed of light in both direction - M and G (see drawing)
Can outrun an exploding star - on MG fields

Create imaginary destination in space - by going to inner sanctums of the field
UFOs travel by creating destination point in front and getting pulled in
UFO travels into a clean and protected environment in front of them
You always fly into a vacuum, because you create a higher order M field.

This is why you see UFO as a light

The higher the field strength the faster you travel - with shielding

KF is NOW building new spaceships - delivery in couple months

Spacecraft will seat 6 passengers for space flight - shown January in Linz

Q: How is that point B (a point in empty space) created?

Need higher field strength than travel to create destination point

No weightlessness (during UFO travel) - it's irrelevant what is going on outside

Traveling as light - create M field inside to stay positioned controlled

Body is made of Gans - interacts with M field - stays constant

You create a condition for soul to be contained in Gans condition of body

Mexican food example - all created by field strength of emotion

We have to learn how to work with higher emotion levels - Love

Work with emotions higher than - the emotion encaging our soul

Making food at home is like - creating destination point in space

There is a difference between traveling to sun or your own point

Only difference is - you create the destination yourself

Secret to creating own destination point in space:

You send out 2 different fields - they become a plasma - you connect to it

Stay warm in body when cold temperatures outside

Q: When the neutron splits - electron is a creation - and the proton the creator ?

Proton is not creator - neutron splits to electron and proton

(Nuclear) fusion does not exist as understood

If you convert them to plasmatic fields - fusion - by putting fields together

But, unless you convert into plasmatic fields, and than put the fields together, that they take what they like, in balance out, if they have in common - yes can be done.

"Fusion" is done in the body all the time

Q: How our physicality will remain if we travel by the light?

High speed travel in physical D - Lot of hazards - limits to compression of fields

Traveling by the soul

Q: What happens to the physicality when we travel through process of light?

Our physicality is an Illusion of Fields - 3 layers of field interaction

When change M fields of environment - Field of skin act as Gans's - not matter

Gans state of skin allows STM to encapsulate STP - STP keeps integrity

Understand skin is not solid state matter - composition of Pl field interactions

Skin fields can individually interact with environment

Or keep as one - and change environment around - to create speed

Matter itself has a dimension of - physical interaction of fields

Solid stone on earth - moved to moon could become creatures - walks talks

Based on field strength interaction - why STM encompasses STP

I keep going back to the fact that it is - All about interaction of fields

Skin is dynamic fields - interaction of its layers creates containment of body

The body - the skin - is a mirage
Nothing in U is physical - interaction of fields - depends reference point observer
What is elevation of the Soul of Humanity and the STM?
Elevation of STM - Live independently by your own will - any position
Presently the STM is encaged by fields of physicality - tranquilized
STM understanding its own existence - emotion of physical condition
Aware of higher order PI within - Live independently and detached from physicality
Traveling by soul - emotional connection
Like adding magnets to a group of magnets - all re-position
In plasma - it's like knowing what your lover wants without asking
Iranian people learning to travel with soul
I hope you listen to the teaching part of today and learn a lot. Thank you

ENGLISH TRANSCRIPTION

(:11).

K- .. So many of our teachings are destined for our children and grandchildren, and great grandchildren, that by the time the T is developed, they'll be the beneficiaries of these new breakthroughs. Science moves on and to bring a radical change we need a radical new science. In that way we can change a lot fo things, and at the same time bring our leaders to understand that the time for change has come and in some many directions they can take us that does not lead to war and conflict but toward development of new T and sciences that improves the life of the man, not only on this planet, but beyond.

In the last week's teaching we concentrated on Book 2, which is the Light. What is the light. The transportation method in the dimension (D) of the U and not man made rocket T and the donkey. We see in the progress and development how far we can open this knowledge. It's good to have this knowledge, but what can we do with it, What are the opportunities it offers us and how we can manipulate it to become a positive point in the structure of the life of the man or any other creature across the U.

Mankind is one of the latest, what I call races, which has opened his eyes to the light, understanding it even as of last week, that light is not just the light you see, but a means of transportation, is a means of getting form one to another, not having the energy inside to burn, but using the resources fo the two ends where you want to be, where you create the D and the direction. In a way, when we go to the moon we don't need to burn fuel the way it is a tradition today, but we just tune to the heartbeat. We tune to the M field strength, we tune into the rhythm of the life of the moon, the way our oceans do, (:14). and moon allows us to find our position in respect to it. In the future transportation in the GM field system we dictate how much gravity and how much M field we create within our system that allows us to position ourselves 1 meter away from the surface of the moon, 1 km, 1,000, or 1 million km away from it. Now we understand the process, .. that by M and G positioning ourselves with respect to the position and destination, we have new opportunities.

We create new D and directions in the world for science and T. In the world of transportation and transmutation (T&T) we move in the manner that it is easier to achieve everything that we wished for. In a way, if this is our destination 6th of 6, 2022, and we are still on earth fiddling around, what are we going to do.

All we need to do is create the GM field within a smaller system, within your cores, the single reactors you have, double reactors you have, and this planet continuously sends us waves of fields both directions, M and G. Depending on which one you can tune into, we can fly and position ourselves anywhere, (:16). within the span, and even on it. If we extend the knowledge, in it. The beauty of the new S&T is that when for example, the moon sends its fields, we convert it back in our system, and we get back, on the backtrack of the G. In a way, once we discover any of the 2 GM fields instead of this field, going somewhere, interacting with the liquids of the planet, rising them, and falling them, sequences. We become that water, we become that point of destination where we respond back and we convert back. That's the trick of traveling with the GM field. It is literally like a monkey jumping from 2 strings, from one to another. But this time this monkey knows how to divert it. The process of T&T in the coming time, then it goes on what strength of this fields you want to use. Do you want to be , or do you have the D of it. Then this point becomes absolutely irrelevant, it can be anywhere in the U. (:18). Then at the same time you can decide on which strength of this field you want to catch on to, that in that strength, what strength you will return back to. If this is the speed of light (SL) on earth, this could be the SL in another galaxy. This is your SL let's say 1, and this strength in the inner sanctums it could be 10.

You want to go faster, you go deeper in the strength of the plasma fields of the point of destination. You can go 10 to the power of 6, it depends on what strength to the center of the what we call M fields you want to travel in. Are you going in, or .. out, are you planning to sink in, inside, or are you trying to position further. For example, this #1 (L1) is at this point (farthest out in spiral of plasma), the #2 (L10) is at this point (farther inside Plasma), this one (L1000) is somewhere here (still farther inside plasma). (:20). Then you see you can still choose the ?? great M field and travel thousands of times, millions of times the SL on this planet. This is to you, you are going away from it. This to you coming into it, you decide. You are going anticlockwise. You go clockwise. You go different way. Depends on the position, direction and motion of the place.

With this method of transportation you have one advantage, you can travel to the place where there are no GM fields, but you can create it yourself. You are traveling at the SL of one, and you want to go to a point of imaginary destination here. I don't want to see you at your home, I don't want you to come to my home, we meet in a café, somewhere we are both happy. The café, the rendezvous place is there is no planet, there is no G field area. We zoom in with a GM field of 10, sending the faster speed on, you create a zone of fields of GM fields, and then you travel in, with L1, then you set the speed (L10) and the D and direction, you create your service station in ?? world, (:22). anywhere in the U, because you have created the field yourself.

You don't need to catch it, you are already in it. This goes back to when we taught about multiple reactors. Multiple reactors were not designed only for defense T to create different barriers. The purpose of multiple reactors is you fly with one here (L1), with 10 (L10) here, you create a fields.

So you become the point of destination, pressurized by M fields and by G fields. This is the way man will travel in the time to come. There is no limitation, no restriction in where you want to be. Even on earth you can go into the depth of the planet, without drilling a hole. You create MG field strength of the earth at that point.

Would you like to live within the magma and see what happens. Now it's possible. Now mankind has the knowledge and capability of. Now man is in the position to understand the process of transmutation and transportation (T&T) through M fields and not by burning the fuel, but by rays of the sun that it might collect some.

If you can be clever enough to understand more, you can even swim within the heart of the man, (:24). if you can create its MG field. The doctors of the future will do this. They'll be present when they are repairing a valve of the heart.

It's not the dimension (D) it's the light which arrives and reaches and transfers information and the knowledge. We are not going to be a useless "yellow submarine," but you are going to be with at system which submerges to every point of the U, even in the center of the suns, .. universes, in the center of Unicose.

Now for the first time we see a new opportunity and a new system to be able to breakthrough in the travel of the universal strength. In a process that we create, we are a part of, and we use what we created to achieve what we want to the point of destination, time and space at a speed we choose beyond the imagination of today's man.

Now we come into a new How do we protect ourselves in these environments with the speeds beyond the imagination of the man? today when you travel a 1,000 km and you come to a halt, the whole body goes through ?? a motion, you go through all sorts of physical .. changes. We go through .. different "Gs". (:26). Do we have a G transformation at the speed of light. Or do we create a condition of transformation of the fields of the U that within it. We structure ourselves that our systems, our body has a D of life at any strength of the M fields. Does not matter if you come to it, or you go away from it. would we come to the point of going so fast in different D, that we feel the weightlessness, that we float like a balloon. Does such a thing exist within the speed of light. We can create it, but we don't need to live within it. For man to tune into the M fields of the U, with the physical body has a limitation of physicality, which is your D M field strength of the same structure. This is why we advise man who wants to travel at the speed of a 1000 to convert, instead of wearing a flight suit, to wearing a soul suit. Where the soul becomes the frock of the physicality, that it can protect the physicality within it, which allows it to travel at any speeds because the STM has the D of the totality in a ?? loose direction. We can link to anything at any point as it needs, (:28). to go to, or to come from. The use of the STM, this is what we have been trying to teach you, is not just

to cover your body. It's another tool of transportation of the U. You use through the soul the speed of the light, you use through the physicality of the man the speed of a donkey. You want to live on earth and travel with a donkey, you are quite welcome. You want to travel the span of the U, to the moon, unfortunately, there is no O, no donkey can go. Now you have to find a new donkey, new way, method of transportation, and that is the SL, the speed you can travel in any corner of the planet, U and Unicose. Now you understand why we started teaching about the soul. Because you have to know about the soul, you have to get confidence in what it is, that you can get in it. You can use it, but unfortunately, you already imprisoned it. And you travel after thousands of millions of years, you are trying to get into the car which you locked yourself, with your own hand, your own condition and behavior. If you can get into this car, you don't need the D of physicality, you D of the speeds of the PI, understanding the totality of the existence and wahla, you move from a donkey of a man, to the donkey of the light. The progressive development of the man's knowledge will allow him to go faster and faster by the SL.

At the moment we measure the advancement of the man, what he has achieved in science, (:30). in the world for the creation, the transportation, the knowledge of the creatures of the U, are measured on how faster they can travel on the SL, because as you go from 1 to 10, needs a different knowledge, and when you go from 100, and a 1000, needs a different knowledge. More understanding, more devotion, more detachment that you have no carry, you can create the higher strength, that you can reach the point. It will not be the strength of how many palaces and gold Rolls Royce's you park outside that shows the wealth of you.

The knowledge of how fast you can travel shows the strength of understanding the process of creation. It's not by throwing the weights out of the basket s you were ballooning to go higher or faster. It's to understand the process of the creation of the fields, that allows you to be able to achieve ultimately the speed of the ?? totality of the Creator. The knowledge of totality, because as it comes it encompasses all of it. How long will it take man to go from L1 to L1000 and LC (speed of Creator), it depends on the devotion of the man to the knowledge of the creation, and what will come out of it as he releases more. Knowledge of the U depends on understanding of the process of the interaction of the fields. Knowledge of the man on this planet, narrow-minded to a surgeon of the heart, or engineer of an oil, or a specialist in donkey shoes. (:32).

When you become travel of the U, knowledge of the U is open to man. But man has to understand which part of it, he understands and can be part of. One of the processes, that we say do good, think good, and act good, is that what you collect in the center as an essence of the soul that it become that jumping place, then in the future to allow you to understand to what level of L1, because the more you have, the more you can concentrate in the center. This is why we call planets like earth the nurseries of the creation. Understanding the limitations of the physicality into the D of work of the U, you load your donkey on this life, that when it comes to travel depends how much food you have in your sack to feed your donkey with it.

Mankind becomes so kind to himself that he'll find a kind of man that is kind to himself. that he can create that condition for the life of the man in the U. What you load up on the saddle on the soul of the man on earth becomes the feed of you in the D of understanding the future, in the fields of what you will create, where and how far can you go to create in eh D and directions you strengthen, and creating positions, a new life.

Now you manage to ?? guess, to understand the SL. (:34). You manage to get on the donkey of light to travel the span of the U. How do you keep the integrity of the STM in its travel from one position to another. How do you manage to keep the integrity of the physicality of the man in this travel? How do you keep the understanding of the totality of the ?? emotion. Here we come to another point of understanding. Here we come to another D and direction.

The way we explained how you can travel from one point to another, now comes the play in reverse. You were going from here to here, in the strength of 1, but you created the strength of 100 for the point of destination, but how do you keep the integrity of the ?? points of the life of the man in that journey? It has to be bigger it has to be different, otherwise it will not be able to keep its field strength, then you need the knowledge to be able to create a field protection, which is at least L1000. Then you have a clothing you have a protection that you make sure the whole package gets to the destination. If it is weaker in the strength, (:36). it will be absorbed by the fields of the U. If it is not stronger and holding than its own transportation method it will be falling out of the basket.

Then you understand, man in the journey to come, to travel the span U even with the UFOs is to understand the process of encagement, the way man encages his soul, now man uses the soul, the higher field strength in the depth of his existence to create that barrier, that whatever is in this, I can hold on to. It is in a way, if you understand it, bringing a higher field strength to become the protection of the totality. There is a secret in how to do this. the secret has always been open to you to understand. This is your M, this is your G, you have to understand which fields of M to release in the deeper strength to cover the weaker strength in the boundary of the physicality of the Pl itself. In a way, you use from inside, to create the condition to protect the outside.

This knowledge has been taught in Book 3 in a clear way. The secret of life in the depth of the U using light T&T, (:38). is clearly defined in Book 3, using references to Book 2. Then you understand mankind does not need spacesuit of NASA or the stupidity of the man under the water. Man is fully equipped within the strength of his soul to travel any position and condition in the U. And all that knowledge from A to Z is in the 3 books. In the teachings of past years, from day 1 the first KS and before, we have covered the whole knowledge. It is for you to unravel the secret. To be able to carry the physicality .. the STM within the D of containment of the ?? soul system, to create a condition of life in any position in the U. Put it this way, the STM creates the condition of the physicality of the man in atmospheric condition of the earth, now you have to go deeper within the soul to create another frock that can protect the same soul within the structure of the Unicosé, within the shields of M fields of the U. Then you understand that all the

teachings in past years had a reason. Mankind has to move to understand the field radiation and cosmic ray, not the way it's done up to now, but in a true essence of the motion in the U. (:40). Understanding the method of transmutation transportation, and understanding even in atmospheric condition of the man transportation of the fields fo the STM. In interaction of the fields of the earth created the man at this point the physical condition. What happens now the man goes to the deeper soul strength with interaction with the fields of the U. Man will have a new look, will have a new manifestation where it encompasses the fields of the physicality of the man. The biggest secret for you is how to release these fields that you can create different D, because once you manage to create this field, the next step is another field, the strength of the field of the Mars, .. of another galaxy, or even the strength of the fields of the Creator. Then you understand transportation ?? by is transporting one, is a physical D in another, which can encompass. This is the true transmutation if the man understands, not by changing materials, but by bringing the fields to create the materials condition as you need, using the same soul, using the same field interaction without the fear of demise. Now you understand how simple we can do so.

In the coming time from KF research centers will provide systems which will allow to encompass the STM that we teach you slowly how to allow the soul, (:42). to create different condition of physicality with manifestation in different field strength, till you learn, then once you learn it becomes a job of a child.

The first child through the process of understanding and interaction of PI field out of the womb of the mother will be tested in a very short time. That the children of the man will be born both in the D of physicality of the baby, and the soul at same time that it has the facility, and knowledge of the speed of the light of the U. When we introduced the first EU, this was the purpose to create the first condition for creation fo the new generation of the man, which has access both to physicality and the soul at the same time with the knowledge fo the physical D, that within it, the knowledge of the U and creation. That man will not do any more wrong.

New generation of children of the Man - will be flawless - never kill

The new generation of the children of the man will be flawless. They shall never kill. They shall never destroy as they know what they need they can achieve within the D of the soul. Then they don't need to speak wrong, to do wrong, or think wrong, because everything is in their grasp to live a perfect life. The children of the Creator.

The first of these children will be born to man very soon, and from there on, the new race will start. Then they will teach the man of now, how to handle the new understanding. The way our children are teaching us how to handle the joystick, how to play the computer game, (:44). because they are 1 step ahead of us in the knowledge.

The future generation of the man will teach the present man how to become detached from the D of the physicality. This is my wish, and my wish is command, and it shall be done.

To understand the totality of the creation, to change the course, that the man can travel in both dimensions, that in the position of physicality he chooses the best, and in this other D, become the best.

In so many ways, man will evolve in every D and direction. We try to explain the knowledge of the U. .. understanding of the totality, .. try to become knowledgeable in the KU.

But first of all, we have to know what knowledge do we carry, what do we call the knowledge of man. What do we assess and access to, as we wish to become knowledgeable in the knowledge of creation.

We have started the process in setting up the first centers, that it brings man to the D of spaceship T in the coming weeks. That we start training and teaching man in the coming months and years to become the man of space, through his soul, that no one needs to buy him a space suit, and no one needs to buy him a submarine suit. That man in the space of the D of his soul can travel in the depth of the U, and not only this planet. You have to be able. (:46). to change in all D and directions. You have to be able to understand the changes which are to come, to be able to live within the D of the creation.

Mankind needs a helping hand to jump from the physical matter condition to the D of the fields of the U. Mankind does not have that knowledge, until does not achieve peace within itself, and within its race, mankind will be barred from entering the both knowledge's. This is what we call the knowledge of the creation.

The first child with this knowledge is already, has already, becomes already part of the race of the man. The knowledge has to be complete. The knowledge has to be understood through the process of the interaction of the fields of the U, and you have all the tools. You have been given all the tools to be able to understand this process, to change, to bring the change, and to be able to sit amongst those who understand the totality of the knowledge.

One day .. mankind will understand the totality and then with it, mankind will break through the total understanding. The process of the creation, .. new D of the life is not anymore on what field energy mankind can attain, but how freely, (:48). he can understand the knowledge of the creation. It's not another machine to be able to leave the fields of the U and the STM, it's the freedom and the machinery of the man's understanding the process of the creation and interaction of the fields of the U.

All those MaGrav systems, .. dynamic systems, .. Gans's, all everything which is within the grasp of the physical knowledge of the man has been given to the man. But as I said many times, you need to move from the D of physicality into the D of the field strength, then you will understand the keys to the heaven will be open to the man to understand the knowledge. Unfortunately, none of you, or very few of you will ever teach this as the knowledge of the U become the pride of the man who is foolish to his own knowledge. Very few of you will endeavor to teach the cross point, as you are aware of one point, if I

teach, would they abuse it, or if I teach, they will lead us to a new D. Then it comes a time when the man will go to the source of the STM, to understand the totality of the operations.

We go to the point to be able to transmute from the D of physicality into the new D of the soul. To understand, (:50). the process of the creation to understand that mankind can become a totally independent entity of life anywhere in the U.

But as I said before, it's like when you like to drive, you need to go to driving school, get an instructor and learn step by step. Most of these steps will be set in the Enhancement Units (EU) around the world. Through the EU we teach you how, .. we show you how you can elevate your soul to come out of the D of physicality and become stronger for different D and directions of the interaction. The EU are not just for the body of the man, but embedded in it is the STM. The interaction with the soul is the ultimate goal and the processing of and production of the EU. We touch the soul, we reach the U. We touch the man, we still be in the prison of the village of the earth. The whole purpose of the introduction of the new systems as you will see in the coming days, the first ones will be public, is to bring a condition, that man can elevate directly through the STM in interaction and T&T of the physicality to the D of the transportation & transmutation in the D of light. In the D of understanding the totality of the interaction of the lights in the U. (:52).

In the coming time, the first spaceship centers will bring this condition that we make them the point of, what we call clean environment for not only the workers of the site, but the souls of the site, where can live in a perfect condition.

We will build the first spaceship institutes, grounds and land, in the beautiful land of Iran. In the coming weeks we'll announce. And the spaceship centers become the space cities that the man will learn how to live across the U. the Iranian KF will announce the location of the new spaceship centers. The first will be built in Iran, and through the new T we release, will make it the position where the man can interact with the U Community's interaction, with us to be able to travel the U, with understanding fo totality. We salute the Iranian government and leadership to facilitate such a system and area for the KF.

We understand the totality of the work that the space T has to come from the excellence of knowledge and not excellence of weapons T. Where every man has access to the totality of the knowledge and understanding the knowledge of the creation and the created.

Where KS can come in and add to the knowledge of themselves, (:54). and the others and maybe those who travel the U, a new knowledge where man has a unique access, to unique emotion and feeling, which is not known so much in the U, the love, the care, the beauty of the creation.

In so many understandings of the T man has made many mistakes, but in the coming time you'll understand the totality of the knowledge of the creation sits within the structure of the man. You do not need to become travelers for a few seconds on the weightlessness, but you become weightless in the span of the U through shedding the unwanted by total, what I call, devotion to serve the U, not only the man.

Nowadays if you serve the nations you become a spy. When you serve the whole of humanity you become unacceptable. Then imagine a man who serves the U, you are definitely the work of the devil to today's understanding.

But in the U Community there is no higher position for a being to serve the U and ?? itself. This will change. This as earth is the embodiment, the source place of what we call, life. The new souls leaving this planet to create a new sun, a new dimensions, will carry this new essence, (:56). with them, that they never shall create any condition, that no harm comes to any collection of physical souls, or what we call plasmatic fields anywhere in the U.

We have seen problems when the STM converts in D of physicality in different positions in U some them comes with the behaviors of the man is still carried within the STP of the man, and we need to change that before we make man, a man of U.

As I said, we start delivering the EU that gradually numbers of men can be elevated to that position, to understand, to be able to become the passengers of the U, and gradually set the scene for the rest to follow. The EU all versions of it, are different means and methods of T&T in the universal D. You want to travel with the totality of the physicality you are welcome to body EU vertical, horizontal, and what we have today. you want to travel with the understanding of the fields of the emotion. the new universal what we call vision EU to be introduced in the coming weeks will allow you to travel in the D of the STM. If the physicality is not of the importance. But we open the eye of the man to the new opportunity of the T&T (:58). I gave you a hint in the teachings of last week where I said I can create shooting star (SS) ?? in every D and direction as you like, as seen by KS who were around. The same knowledge will come from the expansion of the STM plasmatic M fields of the D and the position, as you stand next to me, I decide that you shall see a SS in that direction, and the same time I decide that will see a SS in that D in the same environment. As I explained last week .. The STM decides the position and direction , and the other souls is the satisfaction of knowing the knowledge by knowing it can be done with such a perfection.

It's the same I said to you, you create the craft, and you create the point in D in the U where you want to go to, and in that point you travel. ??/ I create that point and D, not in the emotion of the system, but in the emotion of the man. Now you understand how easily I can move within your soul, your physicality is just a play. (1:00). You see my vision through the soul, your eye fools you to the existence of the meteorite. I create that

meteorite, SS in your soul, and your soul converts it to the reality of the physicality. I am the best magician you ever see in the U. But still live in the frock of the man. The new vision EU is to open the vision of the man to this D of work. We give you your sight back, you recover from your blindness, and your cataract, but the purpose of this system in the long term, to allow the STM to find confidence to take the D of the soul. The first set of these vision EU have already been agreed with Arizona center. This is a part of the peace dividend which is floating and be delivered in a very rapid way.

Understanding the process of the knowledge will make you a beautiful magician. It's very much the man with the coin standing in front of you, 1 second it's there, and 1 second it's not there, but we all know that coin was from the beginning with the man when he arrived. It's how he allows us to see it.

I came with the knowledge, the knowledge of the creation and the Creator, as I am the one, (1:02). in understanding the totality and to share. But depends how vigilant you are to see where the coin comes up, and where the coin might disappear.

We came with the totality fo the knowledge for the man. We took our time, thousands of years from the mountains to deserts we traveled. We came from what we call, the valleys and the forests. But now it's time to educate the man in total, in totality of all, from Amazon to Beijing, to the palaces of the White House, and what we call the mosques of Iran. The knowledge of creation will touch mankind beyond his understanding, and will change man. Will change man in understanding, beyond what he could imagine the creation could be. But first of all you have to accept the peace. The peace of the man within himself, and then the peace with other men in the D of physicality.

Yesterday I was in Vienna and I passed the hotel where the peace negotiations between Iran and 5 plus 1, is in progress. Still the police cars and dignitaries negotiating how to cheat the nation out of its knowledge going on. And I thought, what a fool, the nuclear industry you are trying to cheat is nothing compared to what the man sit outside is watching can give you, (1:04). that it becomes unless even to that, but it still comes from the nation of Iran. You are happy with the crumbs, you can have it, where the cake is with the man outside. Understanding the new T will bring changes beyond the imagination, but the mankind the leaders of this planet, have to agree on one thing, that they are equal in race, in the path of belief, as one nation. I have never failed in any of my work in the D of the creation to achieve what I want. Try to understand the inner sanctum of your own being, what has created you, and what have lead to manifestation of you in the D of physicality. You are not happy with a look, .. a behavior, do not go for a plastic surgery or a psychiatric treatment process, go within your soul. You can change the color of the eye, the shape of the man and the emotion of the man. Where there is no need for the interference of cutting the body of the man open and injecting something in it, because if that is the point of satisfaction for you to happy to be able to serve, that shall be served to you. You will achieve it. If it's for fulfillment of what I call, being better than the others, it's ?? that knife and plastic surgery.

I am sure Dr. Rodrigo is very happy to help you with it. But in that process of helping, if you loose your soul you've lost your knowledge, (1:06). even if you think you have achieved, what you thought you achieved.

Try to create a field systems, that interacts with the field of the STM and not with the physicality. If you come to Linz on the 3rd of October you'll see the new machines which will do that for you. But you can go in as a man and come out as a man, as your expectation was to achieve something which your soul knows the truth what you have done with it, or what you would like to do with it. We invite you to Linz to come and see what is to come.

As I said .. the Linz exhibition is like the Chicago Fair, where for the first time the light was shown by Tesla, the light bulb to light up the city, and became a changing point for all of us. The Linz exhibition is more or less the same, it will change the life of every man, there won't be the light on the streets and the home, but there will be the light within the soul and physicality of the man.

Beautiful Tesla enlightened the physicality, and I enlighten the soul, but for both, the purpose is the same, to bring comfort and progress for mankind, one in the D of physicality and one in the D of the soul.

Maybe as it was the same soul in the prophets of the messengers of the STM, (1:08). Maybe it's the same soul from the knowledge point of view, same with Tesla and the others. Maybe all souls are from the same for both prophets. The progressive development of the science is understanding the truth about the creation. In so many ways, maybe it's time for man to see the light of ???

As we said, we've been and felt the hammer and nail on the cross. We've been the same in Chicago and the other places to see the same progress built. In essence it's the same man, the soul. Maybe some feature physicality similarity, as it has to be the same to receive the beauty in the condition of the creation. In that process you might have seen, the face of Christ, and the Moses, in the same D and direction.

Mankind has to understand the path for him to correct conduct and living and not matter of days, and months, it's been set for thousands of years. Understand the process of the transmutation, then you understand the totality of the creation. Then you understand why we wrote the paper that the prophets and the scientists are the same, (1:10). as in soul, is the same soul. In the knowledge and understanding, the true prophets, and the true scientists, be it from Moses to Tesla.

It comes according to understanding of the knowledge, and one comes from the maturity of the soul. But time has come for the man who matures both to the same time that there is no ambiguity in what the future has hold, will hold for the mankind in the D of the creation of the U. We have to see that some similarities are made and kept that one recognizes ?? of the original soul, which has created the faces, and the time and the places.

I hope you understood a lot today in many D and directions and I hope you understand what is to come. Try to achieve, to understand the process of the interaction of the fields if you want to become the man of the U. Otherwise be happy with playing with Gans's and playing the Gans game till you become mature that there are the fields which this Gans gets, how can I use it to, and for the benefit of the others., than me to achieve. Thank you . Rick .. (1:12).

>>> BREAK >>> 397 KSW (1:18).

Q: Brazil .. translate .. (1:20).

Translates>> Correct me if I am wrong, my doubts are the people in the seas who make surfing, the person goes into the sea, he can go into the flow and support himself through the waves of the sea. This is the first part. (1:22).

The second part all this that you tried to teach us is inside the MaGrav fields of the U, like the guy who goes in the seas, in the waves of the sea, we go and learn the waves of the U. So with this I could use the waves fo the U to go in the velocity that I can tune with in the U .. (1:24) .

So all the process in my understanding is about this manipulation of this MaGrav in the U for us to travel. My doubt is .. how can we serve in this MaGrav of the U. do we need an equipment for this, for me, with the understanding of my own MaGrav I can position myself to a different place.

... I would like to know if my understanding is correct.

K- You understood 100% correct. (1:26). But it depends on what strength you want to travel the oceans and the waves on the oceans of the U. Some of it we see as light, some of it as fields, and some of the true fields of the U are not even visible to the eye of the man. But the field forces of the U are the undercurrents of the sail of every object of the U within the ocean of the Unicose. That's all it is. We try to teach you how to use the field strength, what we call, at the speed that has no D, but on earth, planet earth, has D to be the fastest on the speed of light. In fact, that's all the purpose of the teaching is. for your to understand of travel, of T&T.

Or if you cannot do it with your soul, create the machines, you call it UFOs, that they become the systems that can create the conditions of your soul to do the traveling at the higher speed for you. This is where the change has come, you always went on the donkey, where you went on the earth path and you deposited your soul with it, and they took you from A to B. Now we introduce you a faster aircraft, you call it a UFO, but the soul is still entrapped in the totality of it. But we show you, that with new knowledge, that the soul has an option to be carried on its own. (1:28). Does not need the donkey or the aircraft, or spacecraft. But as you have not learned to move it fast as it can, and has the capability of, we show you a better machines to do it for you, at least till you mature

enough to understand what actually the main captain ?? That's the only purpose of the teaching. ?? new systems, .. UFO to carry this engaged life inside you, or to go faster with it, or to go to new D with it, or trust and understand the master and travel on its own without the spaceship ?? the donkey. It's all you. Depends how many more layers you want to put on this physicality.

Translation ... (1:30). ..

K- Let me explain something very simple. When you are a child and you ask a question from your father and he understands that you have not got the essence of the question, but he is answering you, because he sees a spectrum, and you see a little narrow light through his answers. He tries to find another example, another way to explain the same thing for you to enlighten to understand. And it's more or less the job with ?? We tried long enough to teach the children of man how to do things the right way. And some matured, and some did not, and some went different ways. Now we teach you in one go that we make sure that everybody understands from the same ?? everyone understands the knowledge. And this comes very clearly through the Brazilian community. In the school of the thoughts of most of us around the world, the jungles of Amazon, (1:32). are the most remote place, where the most simplest people live, the most what I call, no knowledge, access to nothing. And we consider them as something out of the line of all of us. We say, "if you live in the middle of jungles of Amazon." Then we have the KS and scientists in universities and governments around the world. As I said, this time, when we listen, especially example, last week, to the Brazilian workshops, which was a beautiful presentation by all the KS from Brazil. When we stood there and listened to them teaching a man in the Amazon, with a very simple understanding of what he has, has managed to understand the T of Gans, and has the same knowledge as the scientists in NASA, and the other space agencies to use the Gans. Simultaneously within months after releasing the T of Cup of Life, the people of the Amazon and indigenous groups are using, making Gans's as we saw in the teaching of the Brazilian group ... This is the true knowledge, .. where to teach, independent of the place position and how ?? of the man which he has chosen for himself. It's beautiful when I see the people in Amazon wearing the Gans rings, (1:34). and making the Gans's for Corona, as we see in the members of Iranian parliament. as we see in the government of China, as we see in the European hierarchy. This is where the knowledge is truly understood with the freedom of choice ..

It's nice. I would like to thank you Rafael and the whole of the Brazilian team, that you took the knowledge to the depths of the jungles of Amazon and when we see them, we see the indigenous people using it to save their lives. It gives me pleasure that we have managed to teach right across this planet. ..

(1:36).

We see it used in Africa in jungles, then we understand we have reached to all of mankind at the same time. And nobody can abuse the biggest ?? ??? I have been present, Rafael and your team and the whole of the KF Brazil. We see the same in Iran, same in China and other part of the world. This is where the true knowledge comes where we

came here to serve. Thank you ... Brazilian team. It was a beautiful presentation, your workshop, this Saturday.

R: indigenous groups .. how the Cherokee nation from US had signed the World Peace treaty July 4th, 2017, about 4 years ago. ..

It would be a good time for to bring aboriginal people and tribes from around the world to speak as one voice, and sign the world peace treaty, (1:38). and perhaps become the first real nation that signer of WPT ..

What do you think about that idea, .. the kf get behind.

K- So you can do, but there is much more that can be done. But we got to support them. there is a big need to put right what has been done wrong to them. But as usual if you try to do this, you are seen as radical groups and all sorts. The way we set the KF we share knowledge for all ?? and all. Maybe we need to strengthen some parts, ... create conditions

R: ... Dean (US) had gotten ... had acquired land and was beginning to do Keshe agriculture.

(1:40).

He is beginning to work with Cherokee ..

K- You got Dr. Guatua and other groups. Hopefully soon we can do it in the coming time ... we bring the Chinese and Iranian agricultural groups .. work all together.

R: ..

K- What happened with your competition

R:

K- Did you manage to get anything done. (1:42).

R: 6 Am CET tomorrow end of voting. Create the future design contest.

Second position of 10 ten for popular votes.

(1:44).

(1:46). .. it's a foot in the door for mainstream science.

K- Do you know what your pitfall is in this contest. This contest is run by NASA, correct.

R: Yeap

NASA has (black listed) KF - will not let fair play

K- NASA has a very strict policy when they put my name in it. You shouldn't have put my name in it. No one in NASA is allowed to consider, talk to anyone connected to MT Keshe. This is directly from the head office of NASA headquarters. So in some way or another they will find a way to eliminate it.

R: I was considering it .

.. they have to start accepting the T.

K- But you have to understand, they find a riddle (1:48). or ?? But it was good to be in it. To expose it.

In the coming weeks you'll see new T coming out of the KF

K- not understanding it. They were told to dismiss ..

R: the judges are not working for NASA ..

(1:50). This is kind of a test. We need to break the ice . This is like the flagship of the KF.

K- What is the highest vote on all the categories put together.

R: 466 votes from all categories

Any other question

(1:52).

(End of long .. talk about Rick's contest ..)

K- Any other questions.

Q; the Visual EU released in a few weeks .. Are these different from the goggles released a few weeks ago.

K- Yes, totally.

Q: ...

K- No they are totally different. We are getting feedback from people on these. ..

(1:58).

Q:

K- No we don't give any preset ideas ...

Nail Fungus clinical trials by KF

Clinical trials Many of you who suffer, especially if you are over the age of 50 - 60, you suffer from what is known as nail fungus ???

Many of you know what it is if you go to these, the lady's go to these .. nail saloons and pickup different kinds of fungus, what you call viruses.

We have developed a T, that all you need to do is literally wet, or soak your fingers and toes 2 or 3 times a day, nothing else. The results are amazing.

(2:00).

(2:08). Q: Iranian

K- Dr. Pharsan ??

Q: in Iranian about voting for contest..

(2:10).

K- .. all the Iranians who have voted (for EU) do not receive confirmation of their votes .. They noticed the voting had reached 370 and then was taken down to 305 and 310 ..

R;

(2:12)

K- .. Because they are promoting this very heavily.

R:

Nobel Prize meeting Delft University for KF discovery of gravity

K- We suspected, anything comes from KF. ?? Do not expect much. It's very much like the Nobel Prize meeting we had in ?? Delft University in Holland in 2011 12. The KF discovered gravity, now we entered for Nobel Prize, we have 5 elite scientists from around the world to meet in Delft U to confirm the discovery and T, and it was all organized by the UN and officials of Delft U and 2 universities in Holland, ?? guests in this meeting.

Nobel Prize is a fake - professor resigns - others threatened

When we attended there were a bunch of taxi drivers and plumbers and I contacted the professor before their name was given, they said they got threatened, if they attend we'll lose our positions as professors in Delft U and couple of other universities and one of them resigned, "the Nobel Prize is just a fake." We've seen this before, so do not worry about it. (2:14). Carry on.

Creating a destination in space without planet - by sending light

Q: Ed .. earlier in teaching traveling to destination where there was not planet .. sending light to a certain destination. ... that light is taxi destination, that at a certain point in the U there will be a certain GM signature perhaps, that the light you send will be the same. There is another parameter of light determines speed 1L 100L how we sense them ...

Is there any similarities. .. when you send light what is

K- What do you mean. (2:16). Explain your self.

Q: Am I right ..

K- If you speak light as spectrum of M fields yes. If you speak light, as we see it, it is part of it. ..

Colors in sunset represent spectrum of different field strengths - like rainbow

When you look at horizon in evening, it's same light but you see different colors of it. Same with rainbow. Different speeds and different strengths of it. In interaction of fields of the U, you have the same thing but different D of strength of the both G and M.

The strength you apply or receive - dictates the spectrum of light

In which strength you have applied it, or you want to accept it, is what will dictate you the spectrum of light. It's something maybe we can explain it in different way.

Strongest source of light - comes from the Creator

The ultimate , strongest source of light ever existed, ever will exist, is the (2:18). emission of the light from the Soul of the Creator.

The light can create subdivisions of itself

To the lowest of all that is not visible to the lowest of the fields. So we have light from the point of, the essence of the manifestation of the Creator, to what is not in the strength that can create fields of ?? subdivision of itself to the light in that D.

Understanding the light - needs confirmation of existence - not visual acceptance

The understanding of the light needs confirmation of the existence, not light that confirms you see the visual acceptance.

Blind man cannot accept frequency - no confirmation - no conversion in brain

When you are blind it doesn't matter if I put an orange or white color, with what intensity in front of you. Your eye does not accept that frequency. .. So you have no confirmation of it, conversion of it within the structure of the brain ..

I can make a blind man see - I confirm what soul wants to see

But as I said many times, I can make a blind (man) to see. Because I can confirm the light of the vision of the soul, what wants to see.

The soul creates a visual manifestation - like bats using sonar

You will see through the soul and it becomes a visual manifestation, bats use the sonar to make a vision.

Light starts with the Creator - interacts with itself - continually subdivides

You can do the same thing with a man, but when you speak about the light, GM field, when that, with us, it starting with the source of the Creators life, interaction of the field if itself, to the light where the vision of the man spectrum, further down, like we don't see, the animals see in the dark where there is less light friction and the rest of it. So there is subdivisions of subdivisions. (2:20).

To travel at higher speeds than vision - have to go deeper - means higher strength

You want to travel, you travel at the higher speed than the vision. You want to go with a higher speed travel, you go much deeper, higher strength. But again in that position you have a speed of, over the speed of light in both directions, not one. (microphone turned off) R; .. your microphone is of

Describes traveling speed of light in both direction - M and G (see drawing)

K- Can you hear me now. .. The speed of light difference is depending on you, on the position. You can travel the speed of light ... draws circles. If this is you, you travel SL in both directions, going to, or going away from. This is A to B, and in reality you are in a circle. (2:22). You short circuited this way to the G, you short circuited to the return. You become M in respect to A. In both directions you can do passing the speed of light. This way you might do it 10 times, this way 100 times.

Can outrun an exploding star - on MG fields

(For example,) there is an explosion in the star, you can get hit. You can still use this for MG field to run away from it, (at) higher speed, that its matter state in respect to you, can reach you.

Create imaginary destination in space - by going to inner sanctums of the field

Or you want to get to the sun, but you want to go faster for whatever reason. you can tune into higher strength field of that sun. But how do you escape that you don't have a position ?? you can create field strength of the higher order by going to the inner sanctum of the field to create this imaginary position field B to go to. I have explained this in a paper about 20 years ago.

UFOs travel by creating destination point in front and getting pulled in

In the present aircraft industry we see "chem." trails on the back. In the space T of today we see a light in the front. This way (airplane) we know in the matter state you'll be there. This way we know you are type of UFOs. Because you create, (2:24). a position of M field, position respect to your position of destination, and you get pulled into.

UFO travels into a clean and protected environment in front of them

And you always in present flight system you are in danger of whatever is in front of you, can lead to your demise. In this system, you always travel in a clean environment, because you have created it. with the backtrack trailer, you have complete protection. But you created this point, and you literally fly, once mankind learns the process.

You always fly into a vacuum, because you create a higher order M field.

This is why you see UFO as a light

When we see a UFO as a light, what you see is what's going into. this thing is sitting more or less on the back end of it. With the plane you see the track in the back. With this (airplane) the more fuel you spend the faster you go.

The higher the field strength the faster you travel - with shielding

Here the higher strength field you go to, the faster you go. Here you have a shield protection. Here you are exposed to physical reality. You can create it again by what we call understanding of the position.

KF is NOW building new spaceships - delivery in couple months

dynamic systems KF has placed the order for the first flight systems to be manufactured for us to be delivered .. next couple of months. (2:26). The first what you call true space ships to create of flight has already gone on order to manufacturers.

Spacecraft will seat 6 passengers for space flight - shown January in Linz

We promised you 6th of June next year. We have started the program already. Full flight system has been put through manufacturers to build the first systems that can fly in ?? real condition of 6 passengers per craft. This systems will be shown by early January in Linz.

Q: How is that point B is created?

Need higher field strength than travel to create destination point

K- .. You have to create a higher .. If this is another planet you create its GM field. If it's not a planet, but a rendezvous point, is nothing. In the teaching .. how to create it. you create a field of a higher order than the speed of the travel, and then you have to create a field, which is higher than the containment in that field at the speed. You don't have this whiplash you have to stop .

There is no weightlessness. (2:28). You say you travel in an aircraft and go 1000 Km/hr. you walk around have your tea sleep and do everything else inside there. It's irrelevant what is going on outside.

In the light system, travel SL, we create the fields that the M field of these stay positioned controlled. We don't create a false compression the way they do in the aircraft you use. You can travel at any speed because the field strength of the system, your body is made of Gans, works, interacts with the M field, which keeps it constant. here you create the compression to keep 1G. here we create the field strength that your body stays at the field strength of itself.

There is no way when you stop, your head falls and the rest of it. ... in the recent time when the cars came out the scientists proved that if you go over 25 mph your eyes will pop out, and your brain will come out your ear. Because they never understood. Now from the beginning you understand.

You create a condition for soul to be contained in Gans condition of body

You have to create a condition that the Gans structure of the body .. and the soul can be contained it. Then you travel at the SL and anything you like. Then you put in a package energy of the field of a plasma, you created, or you call it a soul, can be ?? You create the position destination by higher speed to ... it's very much.

Mexican food example - all created by field strength of emotion

I can explain it if you .. sitting down and you feel you want to go, you want Mexican food. (2:30). You get in your car and you drive to your favorite Mexican food, and you get that food. The emotion of getting, going, and knowing where you are going, and expectation of you are going to receive, all created by emotion. The emotion of hunger, the emotion of the pleasure of the smell, or whatever triggered you to go to Mexican restaurant, comes from the field strength of the emotion of the man.

We have to learn how to work with higher emotion levels - Love

Now we have to learn to work with higher emotion levels. Hunger is something which triggers us to do something for it. Love is another one. But .. we have a beautiful saying in Farsi, you have never been hungry to forget about the emotion of the love doesn't exist, because from the hunger you die. Love can wait. You understand. We say, ... means you never been hungry enough to forget your lover sits next to you, you say sorry you got to stay there, I am going to feed myself first.

Work with emotions higher than - the emotion encaging our soul

So we are aware of higher emotion that control us. Now we have to learn the higher emotion that it can be higher than that encaging of our souls. Then you make that Mexican restaurant, the one down the corner, or the one which is your favorite across the city, or if it is not exactly the 2 you like you go to a supermarket and create that Mexican at home.

Making food at home is like - creating destination point in space

This is the destination, which is nowhere, restaurant, home business. So you create that position in the U when the other 2 are not there. (2:32). We are aware of these differences but we never analyzed them to separate to understand it.

There is a difference between traveling to sun or your own point

Q: ... When you are traveling to a sun or planet .. there are certain GM and emotional context associated with it. In just a point in space it is not the same as a star ...

Only difference is in one - you create the destination yourself

K - It is because one is already created before, the other one you create yourself. That's the only difference. As I said, you go to the restaurant or you come and make it at home. This is making at home, the position.

Put it this way, McDonalds down at the corner is a place everybody goes to get food. It's not a place of rendezvous .. but you decide to see somebody in the car park .. You made the point of position, not McDonalds I make a car park for you to have a meeting in it. .. You create that position. You have the facility to do because you drive your car there and park. Now that is the new imaginary McDonalds meeting point. You can do the same but with the strength of the field of creating a condition of plasma.

Secret to creating own destination point in space:**You send out 2 different fields - they become a plasma - you connect to it**

What you literally do is this. You send 2 different field compositions. (2:34). The interaction of these 2 field compositions, at this place creates a dynamic plasma field, which your system recognizes. .. Now you created a rendezvous point by yourself, and you are at this point in your spaceship in your soul.
Any other question.

Q: Salomea, ... because I was not allowed I signed a code of conduct so I was not allowed to talk during my activities ..

Regarding EU contest .. I also had a problem. I am citizen of planet (2:36).

.. Light is part of our soul or the means of T&T of fields. Soul is principle matter interacting with other Pl. My question is, transport at soul level ... because we Can we convert light at soul level at physicality like Tesla did.

We'll have climate lockdown

We need to be prepared for another lockdown. (2:38). geo climate war .. how we can convert energy at soul level. ???

They doubled the price. People can be killed by cold and hunger .. last night it was very cold last night ... I didn't feel any cold ... (goes on and on)

K- Can you tell us what you are trying to ask.? Because we can be here the whole day. What is your question?

Q: .. can we convert light, (2:40). at the soul level in light , on physicality in order to cope this energetic crisis in Romania, because we can't pay the bill?

Stay warm in body when cold temperatures outside

K- Yes, you can do with the present Gans's. We had this question many times. There is the T available by KS that the physical condition can feel warm, when the condition is freezing. You can create that condition within the body without interaction from outside, but you need a specific condition of M fields of Gans's, to create a condition that you receive it. ??? but you are warm you don't feel anything, like we've done, and has been done.

Q: 2nd question. Do we have a unique soul as neutron split into electron and proton. Electron is a creation and the proton the creator ?

Proton is not creator - neutron splits to electron and proton

K- No, proton is not the creator. How can a proton be a creator when it is created out of something itself, from the electron. They both come from a bigger pot. In a way, it's part of the creator, both of them are. So it's not the creator. even I can tell you that the electron is the creator, is left over as a proton. (2:42).

Q: ... I heard from Mary of UC. .. Can we put together the electron and proton together and create the neutron. .. in fusion

K- No, read the book 1 .. No fusion doesn't exist, fusion is a dream. Bring in fields as two understanding of the same, yes. But fusion doesn't exist. the fusion the way .. or is talked in world of nuclear to bring the electron and proton, is a dream that will never come true. Because none of the equations adds up. Sorry for money spent on research.

But, unless you convert into plasmatic fields, and than put the fields together, that they take what they like, in balance out, if they have in common - yes can be done. Just as it is done in the body of the man. But fusion to bring an electron and proton together to make a neutron, no, because in the beginning energies were released for them to be separated out, of the balanced sheet.

Thank you

Q:

K- Shall we call it a day. (2:44).

Those of you who are coming to Linz, please registered ..
.. if you can't afford the entrance .. we waiver the fee.

(2:46).

We can accommodate 57 people.

Any more questions.

Q: Brazil, .. (2:48).

How our physicality will remain if we travel by the light. what will happen to our physicality?

K- repeat ..

Q:

High speed travel in physical D - Lot of hazards - limits to compression of fields

K- We will not travel in the physical D, when you go to the D of the speed of light. This is what we are trying to bring to be understood, that the high speed travels with the physical D has a lot of hazards. Certain limitations will be brought in by the compression of the fields.

By traveling by the speed of, by the soul of, by the energy of the PI, you can create the PI field and be in it, that it can interact with the fields of the U. You can still travel faster than the speed of light. But then you have to be in the D of the fields, not matter state. (2:50).

What happens to the physicality when we travel through process of light?

Q: ... You said that we travel through the fields. What happens with the physicality state if I choose to travel with this process of light?

K- I don't understand

Q; repeats

Our physicality is an Illusion of Fields - 3 layers of field interaction

K- Our physicality is an illusion of fields. Your skin is 3 layers of fields interaction. It's done in the matter state.

When change M fields of environment - Field of skin act as Gans's - not matter

So when up to a limit, as you change the M field of the environment they interact as Gans's with the environment, not as matter.

Gans state of skin allows STM to encapsulate STP - STP keeps integrity

This is why we can put the physicality within the capsule of the STM to expand to beyond it, and still keep the integrity of the physicality and the STP within it.

Understand skin is not solid state matter - composition of PI field interactions

It's understanding, that our skin is not a solid state ?? capsule or whatever. It's made of the composition of PI fields interaction.

Skin fields can individually interact with environment

All these fields can individually interact with the environment.

Or keep as one - and change environment around - to create speed

Or we can sustain it as one, and change the environment around it to create the speed.
Translate..

Matter itself has a dimension of - physical interaction of fields

We are not in solid state matter, our body even we touch it, it's not a, even a matter has a D of physical interaction of fields.

Solid stone on earth - moved to moon could become creatures - walks talks

If you want to move a stone, a stone could be solid here, but if I take it to the moon, the soul of that stone becomes creatures which walks and talks. (2:54).

Based on field strength interaction - why STM encompasses STP

We are not dealing with a matter condition, that's why the fields of the STM can encompass the fields of physicality of the man, because it is all on a field strength interaction.

I keep going back to the fact that it is - All about interaction of fields

It keeps on going back to understand, we call it, interaction of the fields.

Skin is dynamic fields - interaction of its layers creates containment of body

The skin of the man is a dynamic process of fields, plasmas and the interaction of different layers creates the condition of the containment of the body of the man.

The body - the skin - is a mirage

It's a mirage.

Nothing in U is physical - interaction of fields - depends reference point observer

The total life in the U, if you understand the interaction of the fields, nothing is physical. It depends on the reference point of the observation.
Any other question.

What is elevation of the Soul of Humanity and the STM?

Q: .. elevation of the soul of humanity and the STM. I would like to know how is this process, (2:56). what do you mean about the elevation the soul, could you explain in more in detail?

Elevation of STM - Live independently by your own will - any position

K- The elevation of the STM is for man to be able to live in any D and position, according to his will.

Presently the STM is encaged by fields of physicality - tranquilized

In the body of the man, the STM is encaged and is taken around by the fields of the physicality, by the physicality of the man. He hardly has any control over it. It is like being tranquilized and taken charge of.

STM understanding its own existence - emotion of physical condition

When we talk of elevation of the STM, it's to be able to understand the existence of itself, through if you like to say, the understanding of the emotion of the physical condition.

Aware of higher order PI within - Live independently and detached from physicality

Which means you are aware of a higher order field strength PI within you, and you can give it the freedom to live independently of the physicality. That's what elevation is, and even detached from physicality. That's all.

Any more question.

Q: .. to travel faster in the U does it depend on our degree of detachment, would this restrict where we can go and how far?

K- Yes and roughly no, it depends on your choice. (2:58).

R; little mysterious for now

K- Yes gradually we open up , people understand more of.

Q: Azar .. the rendezvous location which is not a place, just a location. So I have to give you in strength. I am 10,000 and create a location at 1000 then I have to call you and say .. 1000, or you choose your own strength for that location?

K- You'll find out. These things are man made D, talk. When it comes to D of the souls if you have the line of communication or strength connection, that emotion of time and place, in agreement with other fields is very ?? you don't need to give an address. .. When you put ... Ricks magnets, when you put a new magnet in, that is your wish to be in that position you see all other magnets move to accommodate it. There is no location, you move to that, I move to the others. This is the beauty to live in the structure of the soul.

Q: So it's just like when you fall in love, you always know what your lover wants because you can read it.

K- Yes. .. but it depends if it is you in love, or you are both in love. It's a very big difference. (3:00). ?? traffic
you turn up and there is nobody there. Sorry I got the wrong ?? but no.

Q: When I was in Iran ... traveling with the soul, people are doing it in Iran, people have a word for it but it keep forgetting it .. they leave the body.

K- Can you explain the word ??

?? it means a bird.

As is the earth, the U, whatever you call it, so they can travel the U, if I understand correctly the Arabic ...

Q:

>> ...

(3:02). so I made a setup for Cup 1 and 2.

He said, he was trying to travel with his soul. ...

All over Iran they are ready for this travel with the soul. I am older generation, 60 years old but 18 years old, I couldn't believe my eyes. It was such a joyous moment to know people like him exist (3:04).

K- Thank you shall we call it a day.

I hope you listen to the teaching part of today and learn a lot.

Thank you

R; 397 KSW (3:06).

END
